Lesson for August 10

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JAMES TEACHES CONSISTENT CHRISTIAN LIVING

LESSON TEXT—James 1:17-22; 2:14-17; 4:13-17; 5:12.

GOLDEN TEXT—Pure religion and undefiled before God and the Father is this, To visit the fatherless and widows in their affliction, and to keep himself unspotted from the world.—James 1:27.

Spiritually minded but very practical was James, an outstanding leader in the Church (Gal. 2:9; Acts 15) and the brother of our Lord. His epistle speaks little about Christ, but it reflects more of His teachings than any of the other epistles. It parallels the sermon on the mount and in that way, as well as other ways, greatly resembles the teachings of Jesus. It is a straightforward discussion of practical Christian living.

There is so much inconsistency among Christians in their daily walk that nothing could be more needed than a careful study of the exhortations of James.

I. Be Doers of the Word—Not Hearers Only (1:17-22).

Knowing God's will is important, but it amounts to little except to condemnation upon us, unless we do it. It is good to hear with swift apprehension, but there is no merit in talking about what we have heard unless we practice it.

God is the "giver of every good and perfect gift" (that's literally and wonderfully true). He has not withheld one blessing, even to the giving of His Son, who was sent down from heaven to redeem us.

His very goodness should prompt us to lay aside everything which dishonors His name. Wrath (v. 20), uncleanness of speech or thought, pride (v. 21)—all these must go, and will go, as we permit the Word to take root (be "engrafted") in our hearts and lives. Note that it is enough to read the Word, or even to memorize it. It must take root and grow in our life.

II. Believe—But Do Not Forget to Work (2:14-17).

Saved by faith? Yes, we are, and in no other way; but the man who says he has faith in Christ will inevitably show the results of that faith in his life.

James is not in any way contradicting the teaching of Paul's epistles regarding justification by faith, but is clearly stating what must be true, "that a faith which does not result in works, i. e., in a manifestation of a true Christian life, externally and visibly, is not the kind of faith commanded by God, and constantly revealed in the New Testament as the only instrument for the appropriation of the redemption that is in Jesus Christ our Lord. There is no such thing as real, genuine, vital, living, Christian faith, except it has its fruits in the works of faith" (Wilbur M. Smith).

How that faith will show itself in the practical dealings of daily life is graphically presented in verses 15 and 16. Pious talk has always been very cheap, and it certainly accomplishes nothing. Real Christianity works.

III. Trust—But Do Not Boast of Tomorrow (4:13-17).

There is a strange religious attitude which talks about faith as though it were something of which to boast, which encourages people not only to believe, but actually to presume. There is a radical difference between faith and presumption.

All Christians are subject to the temptation of talking about being "strangers and pilgrims" (Heb. 11:13) in this earth, and then planning their lives and their business as though everything will continue as it is through all eternity. It is right to plan, but every day we should plan subject to God's will, always realizing that this may be the day when we shall be called into His presence to give an account of the deeds done in the flesh.

Every hour of life should find us ready to meet the Lord, and with all in readiness, so that our going may leave behind a clear testimony of faith in God, and of consistent Christian living.

IV. Be Honest—Without the Need of an Oath (5:12).

A Christian should never need to give an oath in the ordinary affairs of daily life. His life should be so transparently honest and consistently aboveboard that his word ("yea, yea, or nay, nay") will be "as good as his bond."

The Jews were accustomed to use formulas for oaths such as those mentioned in Matthew 5:33-37. They would have felt much at home in our day when there is so much dishonesty that people are constantly calling on God to witness to their truthfulness. Those who have least to do with Him and the worst records for dishonesty are most prone to thus seek to bolster their word.

What a striking contrast is the simple "yea" or "nay" of the true Christian. Let us make our word always good, because it is the expression of the integrity of our lives.

Fort Protects Pacific Outpost

Defenses on Oahu Island Are Believed Equal To Gibraltar.

WASHINGTON.—The defenses of the island of Oahu in the American Territory of Hawaii are regarded by some experts as superior to those of Britain's Gibraltar, which for a century has been regarded as a synonym for naval and military impregnability.

Major defense construction projects have been undertaken in Oahu, numerous outlying islands of the mid-Pacific, and the Aleutian islands on the northern rim of the great ocean. These developments will have the cumulative effect not only of contributing to the air-and-naval defense of the mid-Pacific fortress, but to the possible retention of Oahu for an extensive period even if the U. S. Pacific fleet should be shattered by an enemy power.

Military and naval experts are reported to have "explored" every contingency that might arise in the defense of the Hawaiian islands, major outlying bastion of West coast defenses, and to have secured and stored plans of action even in the event of serious early reverses in event of a possible war.

Last Word in Defenses.

The tremendous and ever-expanding naval and military concentration at Pearl Harbor and elsewhere on the island of Oahu take into account the effective defense of all other islands of the Hawaiian area, the systematic operations, and the "last ditch" harassment of any enemy fleet defense of Oahu even in event of major reversals for the Pacific fleet.

The view that Oahu's defenses are even stronger than those of Gibraltar rests upon the fact that the strictly military defenses of the island are supplemented by a land area large enough for the swift maneuvering of large military forces and by conditions of surf, beach and coastal indentation which increase the odds against the effective organization of enemy forces that might make a landing.

Aviation and other coastal defenses are being developed on other Hawaiian islands thereby making available for enemy landing which would make an invasion attempt prohibitively costly to an enemy.

Enemy Losses Estimated.

The successful organization of an enemy landing on Hawaii, for example, would entail an initial enemy loss of from 250,000 to 300,000 men. Even if the landing were effected, the enemy still would have an extremely difficult problem of maintaining communications and supply, since there would remain many points from which harassment operations could be conducted by air.

The defense plans take into account the problem of subsistence for the half-million military and civilian population in the event of a long siege. This problem frequently has been the subject of unofficial comment and speculation, but evidently has received more official attention than is generally known.

Besides greatly accumulated reserves of foodstuffs and fuel, it is understood that the defense projects include vast "seed reserves" which would enable quick planting of food crops in emergency times.

Screaming Cargo Is Too Much for Truck Driver

COLUMBUS, MISS.—Hearing the screams of a child as he piloted his truck down the highway near here gave Truck Driver W. H. Dabbs, the "blame of his life," but when he stopped to investigate, he found John Wayne Parham, aged three, hanging by one arm from the back of the truck and crying, "I wanna go home."

The boy had fallen asleep in the truck and upon awakening had attempted to climb out. He told the driver he had been hanging on for more than a mile before he was discovered.

The truck was traveling between 40 and 45 miles an hour.

'Part of America' at War With Germany Already

BERLIN.—The German press discovered today that "part of America" is formally at war with Germany.

The Tuscarora Indian tribe, of New York state, part of the Iroquois group, formally declared war on Germany in 1917 as an "independent people," the press said, because they did not consider themselves included in the declaration of war by the United States.

But the Tuscaroras "never offered to smoke the peace pipe with a German representative" during the negotiations and hence, still are at war, the press said.

New Machine Puts Color Designs on Chinaware

SEBRING, OHIO.—For the first time in the history of the pottery industry machinery is being used successfully at a Sebring firm in the decoration of chinaware, formerly a painstaking manual task.

The new machine, developed within the last year, applies decorations to dinnerware at a rate of speed 35 times faster than the hand-stamping method which will probably lower selling price.

FARM TOPICS

CARE ESSENTIAL IN FILLING SILO

Dry, Unpacked Materials Spoil Readily.

By PROF. R. C. MILLER
(Agricultural Engineering Department, Ohio State University.)

Most effective results in avoiding spoiled silage are obtained by taking proper precautions in silo construction and by harvesting the silage crop at the right period.

In general, silage spoils because it comes in contact with air after it is placed in the silo. Defects in silo construction, use of material which is too dry to pack well in the silo, and too much speed in filling or too little tramping of the material are the chief agencies that permit air to ruin the silage.

Every type of silo whether it be a permanent upright type, a temporary fence structure, or a trench below ground surface can be built to preserve silage effectively if the material placed in the silo is moist enough to pack well or if water enough is added to permit thorough packing of drier material.

The rule of thumb method for determining the correct moisture content for plants going into a silo is that it should be possible to press or wring water from the chopped material. If that cannot be done, water should be added. Plants with ditch" harassment of any enemy fleet defense of Oahu even in event of major reversals for the Pacific fleet.

The view that Oahu's defenses are even stronger than those of Gibraltar rests upon the fact that the strictly military defenses of the island are supplemented by a land area large enough for the swift maneuvering of large military forces and by conditions of surf, beach and coastal indentation which increase the odds against the effective organization of enemy forces that might make a landing.

Aviation and other coastal defenses are being developed on other Hawaiian islands thereby making available for enemy landing which would make an invasion attempt prohibitively costly to an enemy.

Enemy Losses Estimated.

The successful organization of an enemy landing on Hawaii, for example, would entail an initial enemy loss of from 250,000 to 300,000 men. Even if the landing were effected, the enemy still would have an extremely difficult problem of maintaining communications and supply, since there would remain many points from which harassment operations could be conducted by air.

The defense plans take into account the problem of subsistence for the half-million military and civilian population in the event of a long siege. This problem frequently has been the subject of unofficial comment and speculation, but evidently has received more official attention than is generally known.

Besides greatly accumulated reserves of foodstuffs and fuel, it is understood that the defense projects include vast "seed reserves" which would enable quick planting of food crops in emergency times.

Egg Production Reflects Kind, Quantity of Feed

Efficient egg production is influenced by the amount of feed it is possible to induce each hen to eat daily, according to George P. McCarthy, extension poultry husbandman at Texas A. & M. Normally one hen will eat about 80 pounds of feed a year, approximately half of which should be mash and one half grain for best results.

This problem frequently has been the subject of unofficial comment and speculation, but evidently has received more official attention than is generally known.

Besides greatly accumulated reserves of foodstuffs and fuel, it is understood that the defense projects include vast "seed reserves" which would enable quick planting of food crops in emergency times.

Egg mash or laying mash, is the important portion of the feed for hens that are expected to lay. Laying mash is a combination of feeds which are high in protein and other ingredients essential for keeping the hens in good health, as well as for producing a maximum number of eggs.

Laying mash must constitute one-half, or 40 pounds, of the yearly ration. The usual mixtures for laying rations comprise 100 pounds protein supplement and 200 pounds of ground home-grown grains to make a suitable mash mixture. The grains may be corn, maize or hegari in combination with oats.

One hundred laying hens will consume about 3½ tons of home grown grains a year, McCarthy adds. If the net income from the flock is figured on the basis of increased return from home produced grain, the producer will find that he sold his grain at about double the market price. In some cases even greater return can be made.

Farm Notes

The 25 per cent of the people in the United States living on the land are furnishing 50 per cent of the increase in the country's population, according to the bureau of agricultural economics.

* * *

A dairy bull, after he is two years old, should be kept a little on the thin side rather than fat. He will be more fit for breeding, and this slight limitation of feed need not injure his growth.

* * *

The U. S. department of commerce has a current publication of statistical information on exports of American farm products and will keep such information secret because of the war.

* * *

An effective farm windbreak should have several kinds of trees, including evergreens.

* * *

Contrary to many beliefs, the tractor can work more efficiently on curves in farming on the contour than in working up and down the hill.

* * *

Good poultrymen will see that their birds are well fed on growing mash, whole corn, whole oats and green feed during the late summer and fall.

Nip and Tuck

By BESS GOE WILLIS

Watch him, Nip, while I go around and chase him out.

(Public Ledger—WNU Service.)

Minute Make-Ups

By V. V.

Before putting on your dust-proof gloves for outdoor work, of course, you cream your hands thoroughly. And here's another trick—dig your nails across a cake of dumping soap. This will be an added protection against grimy nails—just in case a wee mite of dust does seep through.

Stonewall Personals

Stonewall, Aug. 5.- Mr. and Mrs. Lyle Harding and family, of Norfolk are spending this week with his parents Mr. and Mrs. C. J. Harding.

Miss Mary LeFern Doss, of Appomatox, spent a few days this week with Miss Lina Caldwell.

Mr. and Mrs. Keeling Sisson and family, of Richmond were week-end guests of Mr. and Mrs. G. P. Jennings.

Mr. and Mrs. I. B. Wheeler and daughters, Betsy and Barbara, and Mrs. J. R. Burnette are visiting relatives in Missouri.

Mrs. Charles F. P. Crawley and son left this week for their home in Atlanta, after visiting relatives here. They were accompanied by Miss Faye Stratton, who will spend some time with her sister.

Miss Louise Turnes spent Tuesday in Roanoke.

Mrs. Jennie Bondurant and Mrs. Henry Drinkard, of Lynchburg are spending this week with relatives here.

Misses Martha Thornhill and Lucy B. Davidson spent last week with Mrs. C. T. Roach, in Emporia. Misses and Mrs. R. H. Thornhill and Miss Janie and Elsie Thornhill were Sunday in the same home.

Mrs. Stuart Barrell, of Crozet, is visiting her father, J. O. Davies.

Charlie Perdieu has been assigned to the U. S. S. Brooklyn for foreign service.

Miss Agnes Christian, who is a patient at the Virginia Baptist Hospital, is improving.

Misses Nellie and Louise Turnes spent Saturday in Clifton Forge.

Royal Harding, Jr., of Norfolk is spending this week-end with his grandparents, Mr. and Mrs. C. J. Harding.

Jane—I'm ready to confess! You thought I had some special "knack" with baking. But I haven't! You can make a cake as good as mine today! Just be sure to get Rumford Baking Powder, then you can use any recipe you like without changing the directions. The amount of baking powder called for is the right amount to use of Rumford for perfect results every time. And Rumford contains no alum, never leaves a bitter taste. FREE. Send for new booklet, containing dozens of bright ideas to improve your baking. Address: Rumford Baking Powder, Box R Rumford, Rhode Island.

Milk, Natural Greens Bolster Egg Yield

If hot summer weather has caused your birds' appetites to wane, revive them with green feed and milk, L. M. Black, extension poultryman at the New Jersey college of agriculture, Rutgers university, advises flock owners.

"Toward the end of the production year, layers often begin to lose interest in the standard rations," Black says. "Hot weather also tends to reduce feed consumption and lowered egg yields often result. To counteract these effects, wise poultrymen feed supplementary materials to whet their birds' appetites, bolster depleted stores of vitamins and provide protein to stimulate egg production.

"Natural green material is generally plentiful during summer and proves a welcome addition to the laying ration. Fresh lawn clippings, swiss chard, cabbage, lettuce and many other garden vegetables—even many varieties of weeds—are excellent.

NEW RECIPES, HELPFUL HINTS FOR THE HOUSEWIFE

New ways to prepare dishes, hints to lessen housework and other helpful aids for women will be found in the Housewife's Food Almanack, regular feature with the

New U. S. Fighter in Flight

Shown here in flight for the first time is the newly developed Curtiss Hawk P-40D pursuit plane, now being produced in quantity at the Buffalo plant of the Curtiss-Wright corporation. The new ship is more streamlined than the original Curtiss Hawk P-40 model. Details concerning design are withheld.

1942 Farm Program Now Being Prepared

A 1942 AAA Farm Practice Plan, which indicates whether a farm participates in the Agricultural Conservation program, is now available to every Virginia farm which participated in the 1941 program and every non-participating farm for which the operator requests before November 1 to be considered a participating farm in the 1942 program year, says the state AAA committee.

While October 31, 1941, is the last day that the 1942 farm practice plan may be signed, farm operators who are interested should contact county and community committeemen without delay. Until the farm practice plan is signed, a farm will not be considered as participating in the 1942 conservation or parity programs and will therefore not be eligible to submit applications for conservation or parity payments. However, failure to execute a farm plan will not excuse a farm operator from the provisions of any marketing quota law that may affect the farm.

The approximate maximum 1942 payment which may be earned by carrying out approved soil-building practices on the farm will be shown on the farm practice plan. This payment will determine the amount of conservation materials which may be approved for the farm under the 1942 program.

The soil-building allowance determined for each farm will be the sum of: (1) 2 times the acreage of commercial orchards on the farm; (2) 70 cen's times the acreage of cropland in excess of the 1941 acreage allotments used in computing payments for tobacco, cotton, wheat, peanuts and potatoes; 35 cents times the acreage of fenced, non-crop, open pasture land in excess of one-half of the number of acres of cropland which is capable of maintaining during the normal pasture season at least one animal unit for each five acres; 4.- 31 times the 1940 acreage of commercial vegetables determined for the farm under the 1940 ACP, applicable only to farms having three acres or more of commercial vegetables in 1940.

The Farm Practice Plan, says the AAA, helps the individual to select and carry out soil-building practices which he and the committeemen agree upon as most needed on the farm, and will enable the farm to participate to the fullest extent.

Participation in the program is voluntary. While a farmer may not be able to carry out in one year all practices listed on the farm practice plan, they afford him a workable plan to keep in mind for succeeding years.

Included in the 1942 program, as in 1941, will be a special allowance of $15 which farmers may earn by planting forest trees, in addition to any other allowances which may be computed for the farm. The 1942 program continues the $20 minimum payment that may be earned on any farm which, plus the $15 tree-planting provision which may be earned by planting trees, makes it possible for producers on any farm to earn as much as $35.

BIBLICAL PLAY AT PHENIX

A Biblical play, entitled, "Ruth," will be presented Friday evening, August 15, at 8 o'clock, Eastern Standard Time, at the Phenix school building, Phenix, Va., for the benefit of the parsonage fund of the Phenix Methodist Charge.

BRAFORD—BURNETT

The marriage of Miss Sarah Maude Burnett, daughter of Mr. and Mrs. John E. Burnett, of Stonewall, and Mr. Hugh Stark Braford, son of Mr. and Mrs. L. D. Braford, of Natural Bridge, took place Sunday, August 3, at 9 o'clock in the morning on the lawn of Spanish Oaks, the home of the bride's parents. The ceremony was performed by the Rev. W. A. Irving, pastor of Hebron Baptist church.

AIRPORT IMPROVEMENTS

Work is expected to begin shortly on $2,517,820 worth of airport improvements in Virginia, the War Department has announced. A program involving 288 airports, officially designated as necessary to national defense, has been approved for the U. S. as a while, with a total estimated expenditure of $80,810,110.

PLAY AT FARMVILLE

The Appomattox Skyline baseball team will play at Farmville Sunday afternoon.

Senator Tuck to Speak at Lake Next Friday

Annual Gathering of Young Democrats

It was announced today that William M. Tuck, of Halifax, Democratic nominee for Lieutenant Governor of Virginia, will speak at the annual brunswick stew of the Young Democratic Club of Appomattox County, next Friday, August 22, at Holliday Lake. President W. M. Abbitt of the local club, also announces that state president Franklin Daniel, of Lynchburg, and other guests will attend.

Young Democratic membership tickets are now available, and the public is invited and urged to arrange to attend this annual event and hear Mr. Tuck.

A business meeting of the Young Democrats will be held at the same time.

Ferrell-Shirey Bros. Get Top Prices

At the Pure-Bred Hog Sale held at Suffolk, Va., last Wednesday, Joe Ferrell, of Appomattox received top prices on Duroc boars. This is but another step in the development of high quality stock in Appomattox county, a development in which the leadership has been achieved by the local Ferrell farm, and by the Shirey Brothers at Spout Spring.

At the Suffolk sale, the Shirey Brothers received top prices on Duroc sows.

The Duroc hogs of the Shirey Brothers and of Joe Ferrell have repeatedly won premiums and generally helped to focus attention in Appomattox county on the value of developing high quality stock.

Good way to succeed in business is to give customers more of what they want, and less of what they don't want.

MORRIS FAMILY REUNION

There will be a reunion of the family of the late Nathenial Morris at Wayside Park on Sunday, August 17, at 11 o'clock. Lunch will be served at 1 o'clock (daylight saving time). There will be a program in the afternoon with D. N. Davidson, superintendent of Orange county schools, as master of ceremonies.

Revival services in progress this week at Liberty Baptist church.

We want your name on our list as a regular subscriber.

Final Report Shows Appomattox Lead In Aluminum Drive

Final reports of the weighing of aluminum recently given in a special defense program campaign, brought added distinction to the people of Appomattox county for the fine response here.

According to reports sent to A. F. Patton, Danville, director of the Southern Piedmont Regional Defense Council, the following totals were given in this area:

Campbell county, 1,080 pounds
Cumberland county, 150 pounds
Buckingham county, 90 pounds
Appomattox county, 1,370 pounds
Prince Edward county, 970 pounds
Amherst county, 210 pounds
Charlotte county, 700 pounds
Lynchburg, 7,780 pounds.

The weight of the Lynchburg collection was cut down from 10,168 pounds to 7,780 pounds because of the presence in the collection of a great quantity of non-aluminum items.

The aluminum was collected from the various localities by state highway trucks.

REPORTS SHOW THAT BUSINESS IS ACTIVE

Higher business levels are indicated by:

Increased department store sales, wholesale trade, construction, cotton consumption and coal production, shown in the Fifth Federal Reserve District report.

Bank stock in Appomattox county, a development in which the leadership has been achieved by the local Ferrell farm, and by the Shirey Brothers at Spout Spring.

A drop of 50 per cent in net benefit payments of the Virginia Unemployment Compensation Commission for the first six months of 1941, as compared with the same period in 1940.

A gain of 35.9 per cent in Richmond bank clearings for the week ended July 30, as compared with the same week last year.

An increase of $5,201,071 in the assessed value of Virginia public service corporations for 1941 over the 1940 figure.

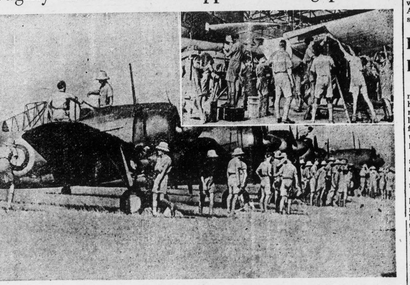

The prospect that payrolls in Virginia tobacco centers will show a market increase when the marketing of the bright leaf tobacco crop of 1941 begins in August.

A steady gain in postal receipts that represents an increase of $171,- 800.50 for 1941 over 1940, reported by the Richmond post-office.

From an exchange comes this smart verse by Francis Moore:

"When after many battles past,
Both tired with blows make peace at last,
What is it, after all, the people got?
Why taxes, widows, wooden legs and debt."

Doughty Little U. S. Scrappers in Singapore

Shipped from New York to Singapore in crates, these Brewster fighting planes, built in the Long Island City plant of the Brewster Aircraft company, were assembled by Royal Air force experts in Singapore shops and re-named "Buffalo fighters." They are now ready to receive "visitors" (presumably from Japan). Insets: The Brewsters being assembled in a Singapore shop after delivery from the U. S.

County Schools Will Open September 11th

Red Leader

Marshall Semeon Budenny, commander of Russian armies operating on the southwestern front, who led the Red counter-attack against the assaults of the German army.

All-Star Ball Game Tonight

The All-Star team of the Skyline league is scheduled to meet the Lynchburg Senators of the Virginia league in a baseball game tonight at the Lynchburg city stadium. The game is scheduled for 8 o'clock.

The first scheduled All-Star game, August 4, was rained out.

Whatever hopes the Appomattox Skyline baseball team had of copping first place in the league, were dashed aground last week-end, and the baseball team did the dashing. Appomattox was one-half game behind the league leading Buena Vista team last week-end. Appomattox went to Brookneal for a game Saturday, and Buena Vista went to Brookneal for a game Sunday. Had Appomattox won Saturday, and Buena Vista lost Sunday, then Appomattox would have been half a game ahead, and needing only a win this Saturday to win the league's regular schedule for the second year in a row. However, the reverse of that happened. Appomattox lost a close game to B ookneal Saturday, and Buena Vista won from Brookneal Sunday. The net result was to fix the final standing in the Skyline league as: Buena Vista first, Appomattox second, Brookneal third, and Bedford fourth.

A play-off series between the top four teams will now be played to determine the league champion. Appomattox will meet Bedford in the two out of three series, and Buena Vista will meet Brookneal. Then the winners of these two series will meet in the finals. Last year Appomattox won both the regular schedule and the play-off.

Featherston Seeks Historical Data

N. R. Featherston, who is recognized as an authority on Appomattox history, is gathering data on Appomattox families and is anxious for local people to supply him with information which he can use in a county historical record he is now preparing.

Mr. Featherston wants complete statistics on Appomattox family trees and desires that his informants list dates of birth and death, marriage records and lists of all children.

For many years Mr. Featherston has made a study of family connections in this section. Many friends have suggested from time to time that he compile the records in written form and have copies made available to the public. That is what he has in mind at the present time. Many families have already supplemented Mr. Featherston's own information with family records taken from family Bibles and other reliable sources, but he warns that a check should be made to see that no name is omitted or that figures on exact dates of births, marriages and deaths are left out.

Appomattox county white schools will open on Thursday, September 11th, it was announced today by J. A. Burke, superintendent of Appomattox county schools.

Mr. Burke released the following announcement about the opening:

"The white schools of Appomattox county will open on Thursday morning, September 11th, 1941, at 9:30 Daylight Saving Time.

"The white teachers' meeting will be held at the Appomattox high school on the morning of September 10th.

"The Negro schools of Appomattox county will open on Friday morning, September 12th, at 9:30, daylight saving time.

"The Negro teachers' meeting will be held on the morning of September 11 at the Carver high school.

"School busses will begin running on the day schools open; the white school busses starting on the morning of September 11th and the Negro busses starting on the morning of September 12th.

"Patrons are urged to take notice of the opening dates of school and the opening hour. They are further urged to make every effort to have all children of school age enter on the first day of school.

"Under the present State Board of Education regulations, children must be six years of age by September 1, 1941, in order to be admitted to school.

Birth certificates must be presented by those entering school for the first time.

"Also, children who have never attended school before should, if possible, be examined by their family physician beforehand and should present a certificate from him upon entering school. This is not a requirement but is urgently recommended."

REVIVAL AT LIBERTY

There will be evangelistic messages at both morning and evening services at Liberty Baptist church this Sunday.

Dr. John W. Kinchloe, of Rocky Mount is preaching each evening to large audiences at the annual revival at Liberty church.

W. M. S. MEETINGS AUG. 20

The regular monthly meeting of the Woman's Missionary Society of Liberty Baptist church will be held at the church Wednesday afternoon, August 20, at 3 o'clock. Mrs. Hattie Welch will have charge of the program. Miss Laura McFadden, who was sent as a representative to camp at Virginia Beach in July, will give an account of her trip.

The Emma Hancock Circle will meet the same afternoon at 2:30 at the church. All members are urged to attend. The subject will be "An Urgent Gospil Demands Trained Heralds." The junior organizations will meet as usual.

LIBERTY CHAPEL REVIVAL

Evangelistic services will begin at the Liberty Chapel Baptist church on Sunday morning, August 17. The Rev. W. A. Hawley will lead in the services. Services each week-day evening at 7:45, and Daily Vacation Bible School at 9:30 A. M.

INCREASED NUMBER OF STILLS ARE CAPTURED

A report by the law enforcement unit of the ABC board shows that 1,772 stills were captured in the twelve-month period ended July 1, 1941, as compared with 1,225 for the previous year. Illicit liquor to the value of $421,515 was seized during the year just ended. This represents 140,505 gallons at the new Federal tax valuation.

Roosevelt-Churchill Confer on War Aims

The completion of a conference "at sea" between President Roosevelt and Prime Minister Winston Churchill was revealed this morning. The two leaders announced an Eight Point statement of the War Aims of Great Britain and America, featuring the disarmament of "aggressor" nations and no territorial changes not acceptable to the free will of conquered peoples. News of the meeting of Roosevelt and Churchill was announced at the same in Washington and London, and was broadcast to the British Empire by Lord Privy Seal Clement R. Attee. Lord Beaverbrook, of the British cabinet, will proceed to Washington to aid in speeding
